PROFESSIONAL SUMMARY

Cybersecurity professional holding an MBA in Cyber Security and a Specialist Diploma in Cyber Security Management, combining strategic and technical expertise across network security, digital forensics, incident response, and cloud infrastructure. Hands-on builder of threat intelligence pipelines, SIEM integrations, and vulnerability management tooling, with a track record of identifying and remediating critical cloud misconfigurations.

TECHNICAL SKILLS

- Security: Network & System Security, Digital Forensics, Incident Response, Security Operations, SIEM (Splunk, Wazuh), Vulnerability Management
- Cloud & DevOps: Microsoft Azure, AWS, SCCM Tools, Cloud Architecture, Docker
- Tools & Frameworks: Linux (LPI Essentials), Python, FastAPI, Nmap, Netstat
- Languages: English (Native/Bilingual), Malay (Native/Bilingual), Arabic (Elementary)

EXPERIENCE

Cybersecurity Intern, Cyber Defence Branch — RAiD (RSAF Agile Innovation Digital) *Aug 2025 – Dec 2025*

- Contributed to the protection of digital infrastructure through hands-on cybersecurity operations, collaborating with industry professionals on real-world defence challenges.
- Architected a hybrid CTI/SBOM orchestration pipeline (Project: sbom_lambda) using Docker-based services (PostgreSQL, MinIO, Huginn) and a custom ti-normalizer FastAPI microservice to ingest OSV.dev and CISA KEV feeds into Dependency-Track.
- Built a high-volume CVE monitoring workflow processing 600,000+ entries, using streaming early-termination optimization and multi-agent triage via Huginn.

Cloud Support & DevOps Trainee — Generation Singapore *Nov 2024 – Feb 2025*

- Completed an intensive bootcamp covering real-world industry scenarios and hands-on DevOps and cloud support projects.

Data Coordinator — WSG Energy Services *Apr 2023 – Oct 2023*

- Identified a critical Microsoft Azure Cloud misconfiguration within Asset Integrity Management (AIM) software, uncovering exposed public security controls that were leaking traffic between Singapore and the UK.
- Drove remediation efforts that strengthened data security practices across the affected environment.
- Managed master tag lists and coordinated system performance upgrades for complex engineering projects.

Assistant IT Engineer — Alpha Synergy International *Jan 2015 – Dec 2016*

- Executed tech refreshes and large-scale laptop deployments using SCCM Tools.
- Resolved incident reports within strict SLAs while supporting the AVA IT Department.

APPLIED & ACADEMIC PROJECTS

SIEM Evaluation & SOAR Integration — Specialist Diploma Capstone, Singapore Polytechnic

- Evaluated SIEM platforms for a simulated financial-sector SOC (RafflesBank case study) and built working Splunk-to-Jira and Wazuh-to-Jira integrations to automate incident ticketing.

OSV Batch Vulnerability Monitor — Personal Project

- Built a Python monitoring tool covering PyPI, npm, Maven, Go, NuGet, crates.io, and Linux distro ecosystems, with delta-only alerting and CI/CD gating on new findings.

VEDA — Vulnerability Exploitation Detection Architecture — Independent Research / MBA Thesis

- Researching an autonomous AI-driven penetration testing architecture for automated vulnerability exploitation detection, developed as MBA thesis research under Singapore institutional compliance review.

EDUCATION

MBA in Cyber Security — Xaltius Academy (in collaboration with BHS Switzerland) *Completed June 2026*
Specialist Diploma in Cyber Security Management — Singapore Polytechnic *Completed Aug 2026*
WSQ Professional Diploma, Leadership and Team Management — Kaplan Professional *Jun 2018*
NITEC in Mechatronics (Medical Technology) — ITE College Central *Dec 2008*
N-Levels — Woodlands Ring Secondary School *Dec 2005*
